Multi-actor partners

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement Nº 773782.
COASTAL will:

- Contribute to integrated coastal-rural planning and coastal-rural synergy in the case study regions and the wider EU territory
- Develop a durable, online platform for knowledge exchange about coastal-rural synergy with concrete examples and tools for supporting land-sea collaboration

HOW?

1. Multi-actor analysis
2. System thinking
3. Graphical system dynamics model

The multi-actor approach applied for analyzing the social-environmental and economic land-sea interactions will highlight potential cross-sectoral interactions and innovation that could emerge from greater cooperation between sea-based and land-based businesses or organisations while also considering the short-, mid- and long-term impacts of decision making and feedback mechanisms on coastal and rural development.

The project is organized around six interacting, complementary Multi-Actor Labs (MALs) spread over the EU, exchanging their tools and expertise.

1. Belgian Coastal Zone
2. South-West Messinia
3. Norrström/Baltic
4. Charente River Basin
5. Danube Mouth and River Basin
6. Mar Menor Coastal Lagoon
